

Theory Questions :-

=====

- Q1.What is object oriented concept?
- Q2.What is the meaning of cross platform?
- Q3.Explain all types of operators in java?
- Q4.Explain all bitwise operators?
- Q5.Explain conditional operators in java?
- Q6.Explain loop and why use it?
- Q7.What is break and continue?
- Q8.Explain types of loop?
- Q9.What is the difference between break and continue keyword?
- Q10.What is array in java and why use array?
- Q11.Explain how many ways to declare arrays in java?
- Q12.Explain types of arrays in Java?
- Q13.What is an anonymous array in Java?
- Q14.How to initialize an array in Java?
- Q15.What is time complexity and why use it?
- Q16.Explain how we can calculate process operation?
- Q17.Explain constant time complexity i.e. $O(1)$?
- Q18.Explain constant linear complexity i.e. $O(N)$?

MCQ Questions :-

=====

Q1. Which data type is allowed in switch?

- A. int
- B. char
- C. String
- D. All

Q2. What is the default case?

- A. First case
- B. Last case

- C. Optional case
- D. Required case

Q3. What happens if break is not used?

- A. Error
- B. Loop stops
- C. Fall-through
- D. Program ends

Q4. Output?

```
int x = 2;
switch(x){
case 1: System.out.print("One");
case 2: System.out.print("Two");
case 3: System.out.print("Three");
}
```

- A. Two
- B. TwoThree
- C. OneTwo
- D. Error

Q5. Which keyword exits switch?

- A. stop
- B. break
- C. exit
- D. return

Practice Questions :-

=====

Q1. Write a Java program to display day of week using switch.

Input: 3

Output: Wednesday

Q2. Write a Java program to perform calculator operations using switch.

Input: 10, 5, +

Output: 15

Q3. Write a Java program to find grade based on marks using switch.

Input: 85

Output: Grade A

Q4. Write a Java program to check whether a character is vowel or consonant.

Input: a

Output: Vowel

Q5. Write a Java program to check whether a number is divisible by both 3 and 5.

Input: 15

Output: Divisible by both
